

## welcome to Discovery ABA

We believe that the needs of the children we serve can be best met through a partnership with their parents and other professionals involved in their lives. Our goal is to help parents and professionals acquire the necessary analytic and teaching skills to facilitate effective intervention and generalization.

Our team provides a comprehensive 1:1 learning environment directly in the child's home with our goals being to establish competent learning skills that will prepare children to function effectively in both home and community-based settings across multiple states.

dream.  
believe.  
achieve.

Shaping the  
future for children  
with autism

# who we are

The Discovery ABA is a provider of customized in-home ABA Therapy services for children 2-18 years old with Autism Spectrum Disorder.

Using Principles of Applied Behavior Analysis, we focus on skills acquisition and effective communication so that your child can lead a successful and independent life.

Our team of highly qualified and dedicated professionals are committed to providing our clients with unparalleled quality of service and care.

## how we help

### functional assesment

We perform a comprehensive functional assessment to create a care plan that will determine your child's strengths, challenges, and learning methods.

### ABA home therapy

Individualized ABA Therapy in the comfort of your home can help your child learn social skills, positive behaviors, academics, communication, and increased focus.

### parent & family training

We empower the family to reinforce positive behaviors, by teaching skills to practice when our professionals are not present.

### school based support

We partner with your child's school to develop effective instructional programs based on the principles and methodologies of applied behavioral analysis.

### social skills groups

Our social skills groups provide a supervised and supportive environment to play with other children while being given continued therapy.

### behavioral intervention

When applicable, we provide this scientific approach to increase positive behaviors through reinforcements, while reducing unwanted behaviors through extinction.
